[HOME](#)[ABOUT](#)[EQUIPMENT](#)[CHALLENGES](#)[CONCLUSION](#)

Hydraulic expertise. Practical solutions. Proven support.

Based in Canning Vale, Western Australia, HWC Hydraulics & Equipment delivers complete hydraulic solutions across Australia.

With more than 100 years of industry experience, our team provides product supply, field service, maintenance, manufacturing, workshop repairs, engineering and design, equipment hire and technical support across mining, oil & gas, agriculture and industrial applications.

OVER 100 YEARS COMBINED EXPERIENCE

OUR CAPABILITIES

Field Services

Breakdown response • Preventative maintenance • Shutdown support • Troubleshooting • Site services

Workshop & Repairs

Component repairs • Rotable rebuilds • Cylinder repairs • Testing • Hose & tube • Pumps, Motors & Valve Repairs

Engineering & Design

System design • Hydraulic engineering • RCA • Modifications • Custom solutions

Manufacturing

Hydraulic power units • Control systems • Fabrication • Custom assemblies

Products & Supply

Hydraulic components • Filtration • Lubrication • Hose & fittings • Critical spares

Equipment & Tooling

Mine-spec service vehicles • Workshop containers • Flushing • Filtration • Diagnostic & test equipment

INDUSTRIES WE SUPPORT

HWC Hydraulics & Equipment supports a diverse range of industries across mining and resources, oil & gas, industrial and agriculture, delivering reliable hydraulic solutions for both fixed and mobile equipment. From critical processing and production systems to heavy machinery and specialised hydraulic controls, our team provides the technical expertise, field support, workshop services and engineered solutions needed to maintain safe, reliable and productive operations.

ENGINEERING & DESIGN

Engineered solutions built around real operational challenges.

HWC's engineering team provides practical hydraulic engineering and design support from concept development through to implementation. Combining technical expertise with hands-on industry experience, we work closely with clients to troubleshoot complex issues, undertake root cause analysis, improve existing systems and develop customised solutions focused on safety, reliability and performance.

Key Capabilities

Hydraulic System Design & Modification • Root Cause Analysis
• System Troubleshooting • AutoCAD, Hydraw & SolidWorks 3D • Technical Documentation • Custom Engineered Solutions
• OEM & Product Collaboration

The service presentation specifically describes qualified engineers and drafters, AutoCAD, Hydraw and SolidWorks 3D, RCA and collaborative engineering reviews.

WORKSHOP & REPAIRS

HWC's Canning Vale workshop provides comprehensive hydraulic repair, rebuild, testing and manufacturing capabilities. Our experienced team is equipped to manage everything from individual component repairs through to complex rotatable rebuilds, with dedicated facilities for assembly, testing, fabrication, machining, hose and tube work, cleaning and finishing.

Component & Rotable Rebuilds • Hydraulic Cylinder Repairs • Pump, Motor and Valve Repairs • Hydrostatic & Performance Testing • Fabrication & Machining • Hose Crimping & Tube Bending • Flushing & Contamination Control • Assembly & Rebuild • QA Documentation & Traceability

FIELD SERVICE & SUPPORT

Responsive technical support where and when it's needed.

HWC provides experienced field service personnel for planned maintenance, breakdown response, shutdowns, troubleshooting and project support across client sites. Our field teams are backed by HWC's engineering, workshop and technical specialists, providing access to additional expertise when complex issues arise and helping clients minimise downtime and restore equipment safely and efficiently.

Breakdown Response • Preventative Maintenance • Shutdown Support • Hydraulic Troubleshooting • Installation & Commissioning • System Diagnostics • Site Maintenance • Technical Support

24 / 7 TECHNICAL SUPPORT

PRODUCT SALES & SUPPLY

Quality hydraulic products backed by real technical expertise.

HWC supplies a comprehensive range of hydraulic and control products to support maintenance, repair, new installations and engineered applications. Our technical sales team works with clients to identify suitable products and solutions for their equipment and operating requirements, combining product knowledge with HWC's broader engineering, workshop and field service capability.

Key Capabilities

Hydraulic Components • Hose & Fittings • Filtration • Lubrication • Control Products • Replacement Components • Critical Spares • Technical Product Support

WHY HWC

Experienced People

Skilled technicians, fitters, engineers and support personnel.

Responsive Support

24/7 access to technical and operational support.

Quality Assured

ISO 9001:2015 certified quality management system.

Safety Focused

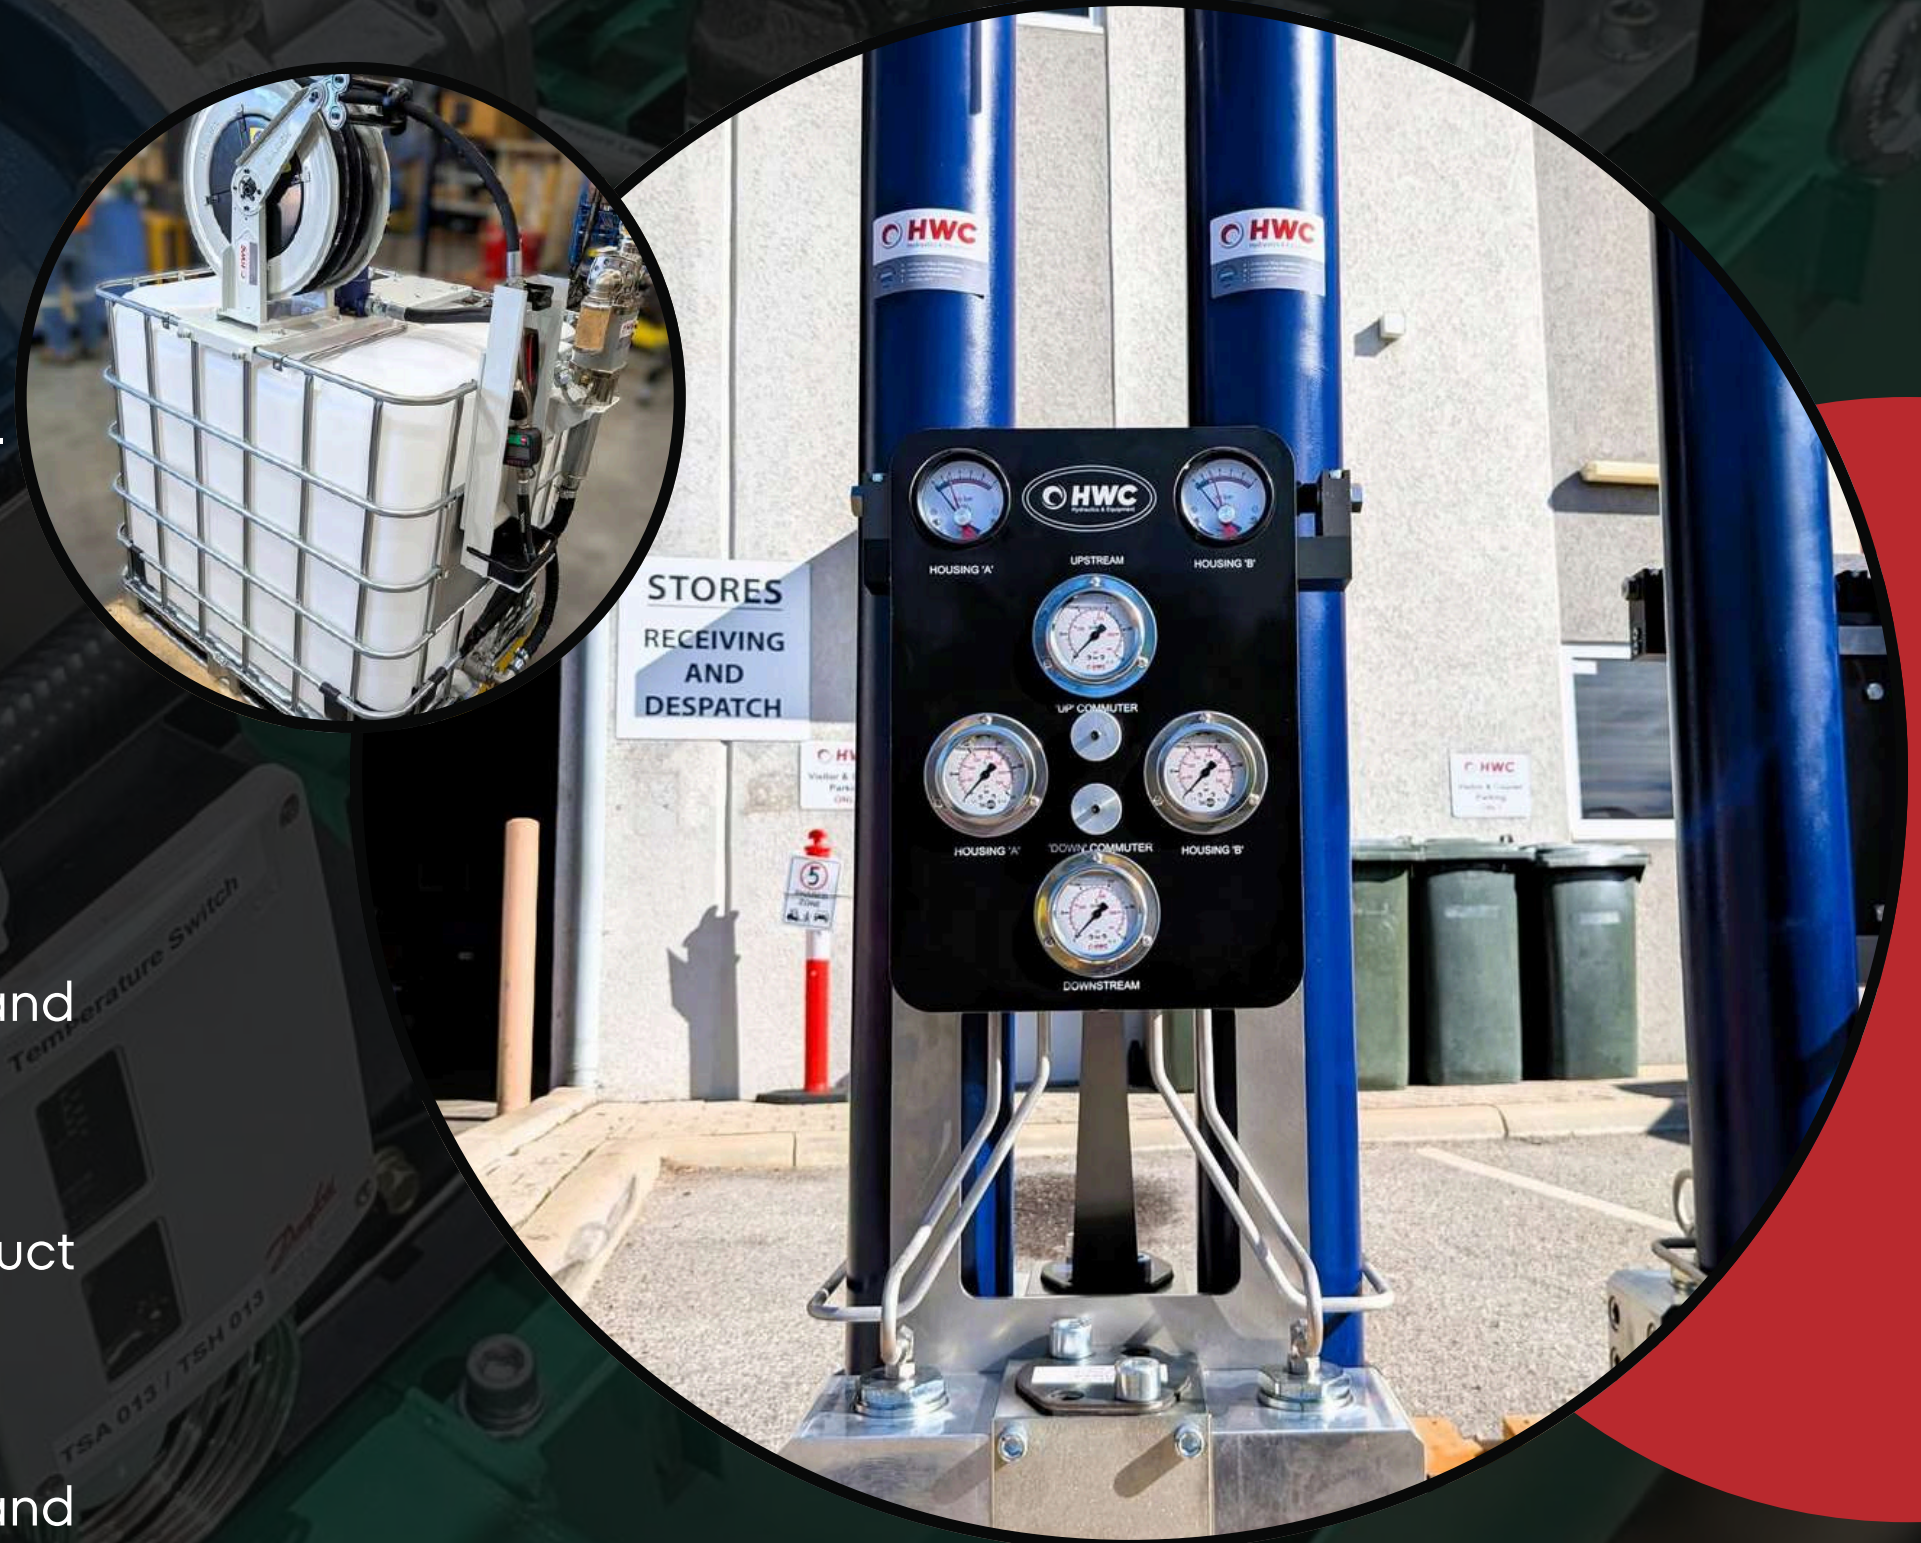

Documented procedures, traceability, JHAs, inspections and continuous improvement.

Technical Depth

Field capability backed by engineering, workshop and product expertise.

Flexible & Scalable

Resources, equipment and technical support for planned and unplanned requirements.
